Mr J. A. Malone,  
Washington, D.C.

Dear Sir

I have been interested in the  
Case of Mr. Power and it has recalled  
to my mind a story of Russia claim  
that they had a defence for any  
attack by plane that cross over  
their border. it was shown in  
one of my paper about 5 or 6 yrs ago.  
it was a series of rockets spaced  
on their border and could bring down  
any plane flyover it they did not  
have to make hit the contraption  
would wreck the plane just as  
it did his.

the rockets were spaced at intervals  
| | | | | | | | with a tower every  
so far. and wired to rockets claimed  
to bring down any high flying plane.  
His description of contraption answered  
that very close. The Orange flare was  
another after effect of a bomb.  
Respect yours
